## Medical College of Bengal.

AFFILIATED, 1857.

1. The Medical College of Bengal was founded by Lord William Bentick, in the year 1835.

The government of the College and Hospital is vested in the Principal, aided by a Consultative Council, composed of all the Professors, subject to the general control of the Director of Public Instruction.

The Principal convenes a meeting of the Council whenever he thinks it expedient to do so, or whenever a requisition, signed by three Professors, and setting forth the question to be discussed, is made to him for this purpose.

At meetings of the Council, the Principal, or in his absence the Senior Professor present, takes the chair. The chairman has a vote in all questions put to the meeting, and in the event of opinions being equally divided, has a second or casting vote.

Minutes of the proceedings of all such meetings are forwarded to the office of the Director of Public Instruction for record, or for such orders as may be necessary.

Any proposal involving a change in the prescribed course of instruction, or in the general management of the College or Hospital, which the Principal may desire to submit for the sanction of superior authority, must be laid before a meeting of the Council for discussion, before being so submitted; and the Principal, when forwarding his own proposal, forwards also any resolution which may be come to, on the subject, by the meeting.

All notices, orders, &c., relating to the internal management or economy of the College or Hospital are signed and issued by the Principal.

## College of Civil Engineering, Calcutta.

AFFILIATED, 1857.

This College was established by Government, in 1856, for the purpose of supplying properly qualified candidates for all grades of the Public Works and Survey Department; and for employment under the different companies engaged upon Indian Railways.

The course of instruction extends over three years, and is adapted to meet the wants of each grade of the Profession; it is limited by the requirements necessary for the Degrees granted by the University in the Faculty of Engineering.

Candidates for admission must have passed the Entrance Examination of the University, or be holders of senior scholarships. Applications for admission must be made on or before the 20th of May, in the printed form, prescribed for the purpose, which may be had on application at the College.

The annual session commences on the 1st June of each year, and closes on the 15th April.

The Government of India is prepared to give, and for the present guarantees employment, within the following limits yearly, to such students as pass the test for the Public Works Department, laid down in Chapter II, of the Public Works Code, viz.

5 appointments in the Engineer branch.	2 to Europeans. 3 to Natives.	{ Salary beginning with from 100 to Rs. 200 per mensem.
13 ditto ditto in the upper subordi- nate branch.	5 to Europeans. 8 to Natives.	{ Salary beginning with 60 Rs. per mensem.
30 ditto ditto in the lower subordi- nate branch.	30 to Natives.	{ Salary beginning with 25 Rs. or 40 Rs. per mensem, ac- cording to qualifi- cation.

These appointments will be given, as prizes, to the most distinguished students when the number of those that qualify exceeds the limits specified; all are appointed on probation for the first year.

Holders of Government Scholarships
are permitted to retain them in this College, for the same time as they would have been entitled to keep them, had they remained at their original Schools or Colleges, subject to the same conditions as regards progress in their studies. They are exempt from fees, so long as they retain their Scholarships.

At present there are two "Forbes" Scholarships (instituted to perpetuate the memory of Major General Forbes of the Bengal Engineers, late Master of the Calcutta Mint) each of Rupees 10 per mensem in value, tenable for one year, subject to progress.

All prizes are awarded on the same conditions that obtain in the other Government Colleges, viz.:—no student over 21 years of age can receive a scholarship, nor if over 23 years, a prize.

On joining the College
an entrance fee of Rs. 10 will be paid by each student and a monthly fee during the first year of Rs. 3, during the second of Rs. 4, and during the third and following years, of Rs. 5. But, in order to encourage Candidates who, in the outset, aspire to the higher classes of certificates, to qualify themselves in the general branches of education, as far as possible, before joining this College,—the nature of which is purely special,—a monthly fee, as above, during the first and second years, but of Rs. 4 only during the third year, will be demanded from those who are qualified up to the first year's course of

Government Colleges, and of Rs. 3, throughout the first three years of their attendance, from those qualified up to the second year's course of the same or senior scholarship standard.

A Candidate having already paid an Entrance Fee in any Government College will only have to pay the difference between that fee and Rs. 10,—the Entrance Fee to the C. E. College.

A limited number of outstudents will be permitted to attend the College on payment, in advance, of a fee of Rs. 15 each session, for each branch of study they desire instruction in. They are not required to undergo any Entrance Examination, but must produce satisfactory testimony of good character, and must, in every way, conform to the Regulations of the College. They are not permitted to compete with the regular students at the public Examinations for Prizes or Scholarships. In the prosecution of their studies, they have the same advantages as the regular students. An outstudent joining after the commencement of a session, must pay the full fees for that session.

Five officers of the Army, under the rank of Field officers, will be admitted annually to study at the College under certain special conditions.

The executive control of the College is vested in the Principal.

He is responsible for the progress of the students in their studies and for their general good conduct. Discipline is maintained by means of fines and temporary or permanent removal, according to the gravity of the offence.

All students must provide themselves with the text books

in use, also with drawing or Mathematical Instruments and Marquois' Scales.

Library and Museum.

The Library is open to all students, subject to certain regulations.

A Museum and Model Room is being gradually established.

Instruction will eventually be afforded in the following branches—

## Hooghly College.

AFFILIATED, 1857.

This Institution was founded in 1836, and is mainly supported from funds bequeathed by Mohammed Moshim, a wealthy Mahomedan gentleman who dying without heirs, in the year 1806, left his large property, yielding an annual income of 45,000 Rupees, to Mahomedan Trustees "for the service of God." Owing to the misappropriation of the Funds, Government assumed the office of Trusteeship. The right of assumption was opposed by the original Trustees, but upheld both by the Courts in India and by the Privy Council in England. The period of litigation extended over many years, during which the annual income accumulated, forming a surplus fund of Rs. 861,100. This fund was devoted to founding and endowing the Hooghly College. It was further increased by a portion of the original Zemindari and by the lapse of various pensions with which the estate had been burdened.

It consists of two departments, an English and an Arabic, and is under the control of the Director of Public Instruction, Lower Bengal.

It was originally opened as a School, by the General Committee of Public Instruction in the year 1835. In 1841, it was converted into a College, when a Principal was appointed, and an increase made to the staff of teachers. The College building was erected, partly by public subscription, in the same year at a cost of Co.'s Rs. 36,679.

The College and its School are for the benefit of all classes of the people, and comprise Christian, Hindoo and Mahomedan students. The fee for tuition, in the College is Rs. 3, ans. 8 a month for each student, and, in the collegiate school, Rs. 2, ans. 8 and Re. 1, ans. 8 a month.

The students of any school are admitted to the College on paying the usual fees, if they have previously passed the University Entrance Examination.

A silver Medal, called the Donnally prize, is awarded annually of the value of the interest on Rs. 1,000, subscribed by the native assistants of the late Abkarree Commissioner's office in memory of the late Mr. A. F. Donnally.

In addition to the prizes awarded by Government, prizes are awarded every year to pupils of the school, called the Ram Lochun prizes, of the value of the interest on Rs. 1,000, which sum was presented by Baboo Ramlochun Ghose, Principal Sudder Ameen, Dacca.

## Kishnaghur College.

AFFILIATED, 1857.

This College was founded by Government, in 1845, and is under the control of the Director of Public Instruction, Lower Bengal.

It was designed to provide education for 500 pupils, and an establishment, commensurate with this object, was sanctioned, to be entertained as the growth of the College might require.

SCHOLARSHIPS.

Since the publication of the last calendar (1861-62,) new rules for the award of Senior and Junior Scholarships have been framed and sanctioned by Government, in accordance with which Junior Scholarships are thrown open to general

competition, throughout the Province, and Senior Scholarships are placed within the reach of all candidates from Colleges affiliated to the University. In consonance with this scheme, and as a part of it, the Scholarships are paid from a General Fund, instead of from the revenues of the Colleges in which the successful candidates have received their education.

The College building is a noble edifice, standing upon 3 beegahs of land, and surrounded by an enclosed compound of upwards of 100 more. It was erected, at a cost of Rs. 66,876 ; Rs. 17,000 of which was collected by private subscription. In consideration of the liberality thus manifested in the district, a donor of Rs. 1,000 is allowed to place a boy free of expense, at the College in perpetuity, and another, for every Rs. 500 additional he may have subscribed. Part of the ground occupied was purchased by Government ; for the remainder, the College is indebted to the munificence of the Maharajah of Nuddea and the Rani Surnomoye of Cossimbazar.

This College is supported by Government and is under the control of the Director of Public Instruction in Bengal. It was opened in November, 1853. The building, long deferred from various causes, has at length been begun. Its foundation stone was laid by the Lieutenant-Governor on Wednesday the 29th July, 1863. The local contribution for the building, with accruing interest, amount to upwards of fifty-three thousand Rupees, to which the Government have added fifty thousand.

Annual Prizes to the amount of Rs. 150 are given by Government, to which sum the native community invariably add from three to four hundred Rupees.

The College has a fine Library to which the Government give Rs. 1200 a year.

### INSTRUCTIVE STAFF.

David Carnduff, Head Master.

## Agra College.

AFFILIATED, 1857.

Agra College is partly supported by Government, and is under the control of the Director of Public Instruction, North-West Provinces. It was established by the direction of the General Committee of Public Instruction in 1823-4,

and placed under the superintendence of a local Committee, consisting of the Government Officials of the place, with a paid Secretary, who also acted as overseer of the Institution.

It was opened to all classes of the population, and “ was designed to diffuse more widely than Native Schools, the possession of useful knowledge, to give a command of the language of ordinary life, and of official business—to teach, principally, Hindee and Persian, with the native mode of keeping accounts (Leclavattee) and to give instruction in Sanskrit and Arabic. It was not designed to impart an elementary Education: the pupils were expected to have made considerable progress before their admission.”

Separate teachers of Sanskrit, Hindee, Persian, and Arabic were appointed. All were taught gratuitously, and more than  $\frac{2}{3}$  of the whole received stipendiary allowances.

Subsequently, in successive years, the introduction of new subjects, and the addition of new teachers gradually changed the character of the Institution, from that of a purely Oriental School to that of an Anglo-Vernacular College, with upper and lower departments of study, having a Principal, and containing (1862) no pupil who does not study English with Urdu or Hindee.

#### ENDOWMENTS, &c.

This College was originally endowed by “ a fund in the districts of Agra and Allyghur, amounting to about a lakh and a half of rupees, from villages formerly held by Gungadhur Pundit, (who held his Jágir, under Educational services, from a late Rajah of Gwalior) ; the interest of which fund and the annual collections from the villages exceeded 20,000 Rupees. To this have been added, from time to time, by Government, additional allowances for Teachers, Scholarships, &c., both sources of revenue amounting annually to

about 35,000 Rupees. There are also Scholarships endowed by various private benefactors amounting to one hundred Rupees a month.

Before the mutiny of 1857, the College possessed a large and valuable library, consisting partly of purchases and partly of donations. Among the latter were Oriental books from Major Thoresby, formerly Political Agent in Rajputana, and the library of the late Hon'ble James Thomason, formerly Lieutenant-Governor of the N. W. Provinces. Its scientific apparatus also was ample and well adapted for the purposes of experimental physics; whilst its small museum of Economic Geology and of some rare coins and antiquities gave promise of rising into considerable interest and utility; but the whole of these collections together with the College records, were unfortunately destroyed in 1857, and the buildings themselves left almost a ruin; they have now however, been restored to nearly their former condition, and present a Gothic structure of some architectural pretension, combined with internal arrangements well adapted to the purposes of the Institution.

*Officiating Principal and Professor of Literature and History*.—K. Deighton, B. A.

*Professor of Mathematics*.—W. H. Cole, B. A.

#### FEES.

The practice of exacting fees, though introduced in 1835, did not come into complete operation till 1848; but the present scale of payment was regulated by the Local Committee in 1846. It depends upon the income of the parents. Those whose monthly income is Rs. 100, pay Rs. 5; those

who have Rs. 70, pay Rs. 3 ; and those who have only Rs. 30, pay one Rupee : all incomes under Rs. 30 are charged 8 annas per month and an entrance fee of 2 Rupees is paid by all.

The average number of pupils is 350.

### Sanscrit College, Calcutta.

AFFILIATED, 1860.

This Institution is supported by Government and is under the control of the Director of Public Instruction, Lower Bengal. It was originally founded in 1824, for the encour-

agement of the study of the Sanscrit language and literature, and at first Sanscrit was studied exclusively. In 1827 an English Department was established which was afterwards abolished by the orders of the General Committee of Public Instruction in November, 1835. In October, 1842, it was re-established by the orders of the Council of Education. Up to the year 1850, it had been under the superintendence of a Secretary, but on the resignation of Baboo Russomoy Dutt, the Institution was re-organised, and Pundit Eshwarchandra Vidyasagar was appointed Principal. On his resignation in November, 1858, the present Principal was appointed to take charge of the Institution.

The College is open to all respectable Hindus, without any distinction of caste. The Schooling fee is one Rupee per month. The upper students read the University Course. In the Examination of 1860, one student of the College passed the B. A. Examination. There are twenty senior Scholarships, varying from twenty to ten Rupees per month, and ten Junior Scholarships of eight Rupees each.

All the students, with the exception of the two last classes, learn Sanscrit and English.

A valuable Sanscrit Library of Manuscripts and printed works is attached to the College, and a Government grant of 300 Rupees per annum is chiefly applied to the purchase of standard English works.

masters. In that year a legacy of two lakhs and 30,000 Rupees, bequeathed by the late Captain John Doveton, together with the increasing resources of the Institution, enabled the managers to extend it by the establishment of an Initiatory School, and a College Department named in honor of the donor of the legacy.

### **La Martiniere College.**

AFFILIATED, 1857.

This Institution was founded by Claude Martin, a native of Lyons in France, and a Major-General in the service of His Majesty, the King of Oude, who, by his will, bequeathed a sum of three hundred and fifty thousand Sicca Rupees, afterwards considerably augmented, to be devoted to the establishment of a school for the Christian inhabitants of Calcutta, under the direction of the Government of the Supreme Court.

To give effect to the provisions of General Martin's will in reference to this bequest, the Supreme Court issued a decree, dated October 22nd, 1832, whereby the present Institution was established and distinguished by the name of *La Martinière*, as directed by the Founder.

#### GOVERNORS.

By this decree, a body of Governors was constituted, consisting of the Governor-General, the members of Council, the Judges of the Supreme Court, the Bishop of Calcutta, and the Advocate-General for the time being, together with four additional Governors to be elected by them annually. The four Governors so elected, with one of the ex-officio Governors, form a board of Acting Governors, to whom the general control of the Institution is entrusted.

### SECRETARY.

Provision is made for the appointment of a paid Secretary.

### FOUNDATION BOYS.

The decree directs "That the Governors shall, from time to time, select from among the Christian population of Calcutta, a sufficient number of poor boys, of an age not less than 4, nor more than 10 years, so that there may always be at the least 30 boys on the establishment of the said school, and that such boys shall be entirely educated and supported out of the funds of the said school." By a subsequent decree, the number of boys on the Foundation was increased to 75. The decree further directs that boarders and day-scholars shall be admitted at the discretion of the Governors, provided that they are not a burden on the charity.

The Institution was opened on the 1st March, 1836. It is divided into two departments, College and School. The Educational Staff consists of a Principal, a Head Master, and five assistant Masters, together with Surveying, Drawing and Music Masters and a Pundit.

### PRIZES AND SCHOLARSHIPS.

A gold medal is annually awarded on the 13th of September, the anniversary of the death of the Founder, to the head boy of the College department, and prizes of books are given in all the classes.

Two Scholarships are also then awarded, tenable for two years, one in the College Department of Rs. 20 a month, one in the 1st class of the school, of Rs. 16.

## Queen's College, Colombo, Ceylon.

AFFILIATED, 1859.

This Institution was founded, under the name of the Colombo Academy in the year 1836, during the government of the Rt. Hon'ble Sir Robert Wilmot Horton, and is supported by the Government of Ceylon, who pay all the salaries and other necessary expenses; these are in part repaid by the fees received from the students, which vary from £1-15-0 annually, in the lowest classes, to £7-10-0 in the highest.

The only endowment is the "Turnour Prize," which was instituted in 1843, from a fund raised for the purpose of testifying respect for the memory of the late Hon'ble George Turnour, at which time the following resolution was passed by the subscribers.

“That the interest of the money raised (£190) be devoted to give one prize yearly in the Colombo Academy, to the most advanced and best conducted scholars; that the sum so awarded be called ‘The Turnour Prize,’ and be placed under such regulations as the Central School Commission may estblish.”

In the year 1861, a Resolution was passed by the Central School Commission of Ceylon, establishing seven Queen's Scholarships in connexion with Queen's College; three being junior Scholarships, of the value of £12 per annum, tenable for three years by students in the Upper School of the Academy, to be awarded to the best answerers at the annual competitive Examinations open to all Candidates; and four being senior Scholarships, of the value of £20 per annum, tenable for four years by students in Queen's College, Colombo, one to be awarded each year to that student who, at the University Entrance Examination, shall stand first of the Ceylon Candidates in the order of merit in the first division.

The Colombo Academy was, for many years, the only Institution in the Island, with the exception of one supported by the American Board of Missions at Batticotta near Jaffna, which professed to give a liberal education to its alumni. Several of its former students have filled and are now filling high offices on the Bench of the Supreme Court, in the Executive and Legislative Councils of Ceylon, and in other important positions.

## Serampore College.

AFFILIATED, 1857.

This Institution was founded in 1818 under the patronage of the Marquis of Hastings, then Governor-General of India, by the Rev. Dr. Carey, Dr. Marshman and W. Ward, who together with Col. Trelling, the Danish Governor of Serampore, and J. C. Marshman, Esq., formed the first Council.

In 1821, it received a munificent donation from the King of Denmark consisting of certain premises to the north-west of the College and this act of liberality was followed in 1828 by the grant of a Royal charter giving perpetuity to the Institution and its endowments. At the cession of Serampore to the East India Company, this charter was confirmed at the special request of the Danish Sovereign.

The ground on which the College stands was purchased chiefly by subscription ; the entire expense of the buildings amounting to about £15,000 was met out of the private funds of the Serampore Missionaries, who were the first promoters of the undertaking. After the death of Dr. Marshman, the funds of carrying on the operations of the College, were provided partly by the endowments, but chiefly by the liberality of J. C. Marshman, Esq., the only surviving member of the original council. On his departure from India in 1856, the College was placed under the general direction of the Baptist Missionary Society, which has since contributed towards its support and become identified with its operations.

It is conducted at present by two European Professors and a European Superintendent of the lower school, assisted by twelve native teachers. The number of youths in the College department is about *thirty*, in the school *five hundred*.

The interest of funds raised by Mr. Ward in Europe and America supports wholly, or in part, several European youths, connected with the Mission or wishing to become so, and also a boarding School for the children of native preachers. Scholarships to the amount of about 40 Rs. monthly are distributed amongst the most deserving of the native students in the College classes.

An education fee, exacted from the European students, contributes to the preservation and improvement of the Library.

The course of study is intended to impart a liberal education, and special intention is paid to the principles of Christianity.

The present members of the council are J. C. Marshman, Esq., M. Townsend, Esq., M. Wylie, Esq. Revs. J. Sale and J. Trafford ; Secretary, Rev. W. Sampson.

The education is conducted by Rev. J. Trafford, A. M. Principal, Rev. W. Sampson, Professor of Mathematics, and E. Dakin, Esq., Head Master of the school.

ENGLISH POETRY.

*Examiner.*—REV. J. CAVE BROWNE, M. A.

1. Give a short contrast between Goldsmith and Cowper as Men, and as Poets.

2. State the languages from which the following words were introduced into the English :—

Village, health, plenty, laboring, laughter, tyrant.

3. Describe the different sorts of verbs, giving an example of each.

4. Give a concise paraphrase in prose of either or both of the following passages.

“How often have I blessed the coming day,  
When toil remitting lent its turn to play;  
And all the village train, from labour free,  
Led up their sports beneath the spreading tree;  
While many a pastime circled in the shade,  
The young contending as the old surveyed;  
And many a gambol frolicked o’er the ground,  
And sleights of art and feats of strength went round.

“ Beside yon straggling fence that skirts the way,  
 With blossomed furze unprofitably gay,  
 There in his noisy mansion skilled to rule,  
 The village master taught his little school ;  
 A man severe he was and stern to view ;  
 I knew him well, and every truant knew.  
 Well had the boding tremblers learned to trace  
 The day’s disasters in his morning’s face ;  
 Yet he was kind ; or if severe in aught ;  
 The love he bore to learning was in fault.”

5. Parse the following couplet—

“ O blest retirement ! friend to life’s decline,  
 Retreat from care, that never must be mine.”

6. Explain briefly the allusions in the following passages:—

(α.) “ But times are altered, trade’s unfeeling train  
 Usurp the land, and dispossess the swain.”

(β.) “ Those poisonous fields, with rank luxuriance crowned,  
 Where the dark scorpion gathers death around.”

## ENGLISH PROSE.

*Examiner.*—J. S. GRAVES, *Senior*.

1. Write the following passage correcting misspelt words—

“ The advance of the human mind towards any object of laudible persuit may be compared to the progress of a body driven by a blow. It moves for a time with great velocity and vigor, but the force of the last impulse is perpetually decreesing, and though it should encounter no obsticle capeable of quelling it by a sudden stop, the resistance of the medium through which it passes, and the latant inequallities of the smoothest surface will by continual retar-dation wholly overpower it.”

Explain "driven by a blow." What is the medium through which it passes? Define "retardation" and give its opposite.

2. Youth enters the world with very happy prejudices in her own favour. She has not yet learned that the most evident claims to praise or preferment may be rejected by malice against conviction, or by indolence without examination; that some are engaged in complications of interest which they imagine endangered by every innovation and that whoever aspires to the notice of the public must struggle with the opposition of the daring and elude the stratagems of the timorous, must quicken the frigid, and soften the obdurate, must reclaim perverseness, and inform stupidity.

Alter the above by substituting plural nouns for singular abstract nouns. "That some are engaged," &c., verify the remark by any recorded fact.

3. Give some of the leading traits of the character of Pizarro, with instances from his life.

4. Give an account of the method pursued in the capture of the whale.

5. What were the principal productions and manufactures of Taheiti as observed by Captain Cook.

6. Give the feminines of Abbot, hero, executor, negro and the plurals of tyro, hero, loaf, grief, staff, distaff, seraph, medium.

7. Write short sentences, each containing some part of one of the following verbs, not being the last word of a sentence,—desist, persist, insist, reflect, resolve, accuse.

8. Correct the following.

(a.) I have lent him a book last week which he did not return as yet.

(b.) The natural objects have been in general arranged, for purpose of the classification under ~~the~~ minerals, the vegetables, and ~~the~~ animals.

(c.) The pleasures of the understanding are more preferable than those of the senses.

*Note.*—The correct sentences to be written in full.

Terrificos ciet, atque irasci in cornua tentat,  
Arboris obnixus trunco; ventosque lacessit  
Ictibus, et sparsâ ad pugnam proludit arenâ.”

(β.) “En omnes, et Trôes, et Arcades, hi sunt;  
Fatalisque manus, infensa Etrurea Turno:  
Vix hostem, alterni si congregiamur, habemus  
Ille quidem ad superos, quorum se devovet aris,

Nos, patriâ, amissâ, dominis parere superbis  
Cogemur, qui nunc lenti consedimus arvis.”

5. Translate and explain either or both the following :—

7. Scan these lines, and explain any exceptional rules of Prosody

"Pilumno quos ipsa decus dedit Orithyia :"  
"Fatilisque manus, infensa Etruria Turno,"

### LATIN PROSE.

*Examiner.*—J. S. GRAVES, *Senior.*

1. Quarta restat causa, quæ maxime angere, atque sollicitam habere nostram ætatem videtur ; appropinquatio mortis, quæ certe a senectute non potest longe abesse. O miserum senem, qui, mortem contemnendam esse, in tam longa ætate non viderit ! quæ aut plane negligenda est, si omnino extinguit animum ; aut etiam optanda, si aliquo eum deducit, ubi sit futurus æternus. Atqui tertium certe nihil inveniri potest. Quid igitur timeam, si etiam non miser post mortem, aut beatus etiam futurus sum ? quamquam quis est tam stultus, quamvis sit adolescens, cui sit exploratum, se ad vesperum esse victurum ? quin etiam ætas illa multo plures, quam nostra, mortis casus habet : facilius in morbos incidunt adolescentes ; gravius ægrotant, tristius curantur, itaque raro veniunt ad senectutem : quod ni ita accideret, melius et prudentius viveretur. Mens enim, et ratio, et consilium, in senibus est : qui si nulli fuissent, nullæ omnino civitates essent.

Translate the above into English.

Give the principal parts of *angere*, *victurum*, *accideret*.

What other verb makes the past participle *victurus* ?

What is the difference between *incidunt* and *incidunt* ?

Compare *tristius*, *melius*, *prudentius*.

Distinguish between the meaning of *abesse*, *deesse* and *prodesse*.

2. Translate—

*Est autem amicitia nihil aliud nisi omnium divinarum humanarumque rerum, cum benevolentia et caritate summa conscientia : qua quidem haud scio, an excepta sapientia nihil quicquam melius homini sit a diis immortalibus datum. Divitias alii repetunt, bonam alii valitudinem, alii potentiam, alii honores, multi etiam voluptates : beluaram hoc quidem extremum est : illa autem superiora, caduca, et incerto, posita non tam in nostris consiliis, quam in fortunæ temeritate. Qui autem in virtute summum bonum ponunt, præclare illi quidem : sed hæc ipsa Virtus amicitiam et gignit et continet : nec sine virtute amicitia esse ullo pacto potest.*

3. Render into Latin.

Isocrates says that he wrote in his ninety-fourth year, that book which is entitled *Parthenicus* ; and he lived five years afterwards ; whose master *Leontinus* completed a hundred and seven years : nor did he ever grow remiss in his study. When it was asked of him why he wished to live so long ? I have nothing says he, that I can reproach old age with.

1. Give the argument of the second Book of Paradise Lost.

2. Paraphrase the following passage and parse the words in italics.

“Nor fail’d they to express how much they *praised*,  
 That for the general safety he despised  
 His own : for neither do the spirits damn’d  
 Lose all their virtue ; lest bad men should boast  
 Their specious deeds on earth, which glory excites,  
 Or close ambition *varnish’d* o’er with zeal.  
 Thus they their doubtful consultations dark  
 Ended, rejoicing in their matchless chief :  
 As when from mountain tops the dusky clouds  
 Ascending, while the north wind sleeps, o’erspread  
 Heaven’s cheerful face ; the lowering element  
*Scowls* o’er the darken’d landskip *snow*, or shower :  
 If *chance* the radiant sun with farewell sweet

Extend his evening beam, the fields revive,  
The birds their notes renew and bleating herds  
Attest their joy, that hill and valley rings."

3. Give the meaning and etymology of the following words and expressions.

The sleepy drench—the vast abrupt—alchymy—froze—  
buxom—the unfounded deep—Empyrean—behoof—serried

With conquest, felt the evenenom'd robe.

(b) Abhorred Styx—Sad Acheron—Fierce Phlegethon.

(d) ————— In him all his Father shone

Substantially express'd.

(e) Now turning from the wintry signs, the sun

His course exalted through the Ram had run,

And whirling up the skies, his chariot drove

Through Taurus and the lightsome realms of love.

(f) On barbed steeds they rode in proud array

Thick as the college of the Bees in May.

5. Which are the only real pronouns? To what other part of speech may all the others be referred?"

6. Explain the following passages and in the first passage distribute the words according to the languages from which they are drawn.

And foam in fetters;—but is earth more free?

Did nations combat to make *one* submit;

Or league to teach all kings true sovereignty?

What! shall reviving Thraldom again be

The patched-up idol of enlighten'd days?

Shall we, who struck the Lion down, shall we

Pay the Wolf homage? proffering lowly gaze  
And servile knees to thrones? No; *prove* before ye  
praise!

- (b) And wild and high the "Cameron's gathering" rose!  
The war-note of Lochiel, which Albyn's hills  
Have heard, and heard, too, have her Saxon foes:—  
How in the noon of night that pibroch thrills,  
Savage and shrill! But with the breath which fills  
Their mountain pipe, so fill the mountaineers  
With the fierce native daring which instils  
The stirring memory of a thousand years,  
And Evan's, Donald's fame rings in each clansman's  
ears!

### ENGLISH PROSE.

*Examiner.*—REV. W. C. FIFE.

1. Paraphrase the following passage:—

"There is no kind of writing, which has truth and in-  
struction for its main object, so interesting and popular, on  
the whole, as biography. History, in its larger sense, has to

deal with masses, which, while they divide the attention by the dazzling variety of objects, from their very generality, are scarcely capable of touching the heart. The great objects on which it is employed have little relation to the daily occupations with which the reader is most intimate. A nation, like a corporation, seems to have no soul, and its chequered vicissitudes may be contemplated rather with curiosity for the lessons they convey than with personal sympathy. How different are the feelings excited by the fortunes of an individual—one of the mighty mass, who in the page of history is swept along the current, unnoticed and unknown! Instead of a mere abstraction, at once we see a being like ourselves, “fed with the same food, hurt with the same weapons, subject to the same diseases, healed by the same means, warmed and cooled by the same winter and summer” as we are. We place ourselves in his position, and see the passing current of events with the same eyes.

2. Relate very shortly the chief events in the life of Admiral Blake, and enumerate the points of his character which Dixon has especially exhibited.

3. Explain the following sentences, parse the words in italics and apply the rules of syntax:—

(c) “Lope de Vega was an improvisatore.”

(d) “The inhabitant of Great Britain, that *ultima Thule* of the ancients, can now run down to the extremity of Italy in less time than it took Horace to go from Rome to Brundisium.”

4. Give the derivation of each of the following words:

*Admiral, cable, chivalry, diamond, harbour.* Substitute equivalent words of Saxon origin for the following words of Latin derivation, *annual, edifice, celestial, timid, mortal, audience, fraternal.* Analyse the words, *duckling, streamlet, former, next, upmost.*

5. Define *Orthoepy* and *Orthography*, and give examples of the *insufficiency, redundancy* and *inconsistency* of the English alphabet. Correct the false spelling, where it occurs, in the following list of words, and give reasons:—*Permitted, benefitted, regretted, bigotted, curable, chargeable, awful, peaceful, skilfull, wisely, truly, abatement, abridgement.*

2. Translate the following passage into English :—

“*Animus hominis* habet primum memoriam, et eam infinitam, rerum innumerabilium : quam quidem Plato recordationem esse vult superioris vitæ : nam in illo libro, qui inscribitur Menon, pusionem quendam Socrates interrogat quædam geometrica de dimensione quadrati : ad ea sic ille respondet, ut puer : et tamen ita faciles interrogationes sunt, ut gradatim respondens eodem perveniat, quò si geometrica didicisset : ex quo effici vult Socrates, ut discere, nihil aliud sit, nisi recordari : quem locum multo etiam accuratius explicat in eo sermone, quem habuit eo ipso die, quo excessit e vitâ : docet enim, quemvis, qui omnium rerum rudis esse videatur, bene interroganti respondentem, declarare, se non tum illa discere, sed reminiscendo recognoscere : nec vero fieri ullo modo posse, ut a pueris tot rerum, atque tantarum insitas, et quasi consignatas in animis notiones, haberemus, nisi animus, antequam in corpus intravisset, in rerum cognitione viguisset. Cumque nihil esset, ut omnibus locis a Platone disseritur, (nihil enim ille putat esse, quod oriatur et intreat, idque solum esse, quod semper tale sit, qualem ideam appellat ille, nos speciem,) non potuit animus hæc in corpore inclusus agnoscere : cognita attulit : ex quo tam multarum rerum cognitionis admiratio tollitur : neque ea plane videt animus, cum tam repente in insolitum tamque perturbatum domicilium immigravit, sed cum se collegit atque recreavit, tum agnoscit illa reminiscendo.”

Quatuor et viginti peditum Romanorum millia sunt scripta, et mille octingenti equites: sociorum quadraginta millia peditum, quatuor millia et quadringenti equites: naves ducentæ viginti quinqueres, celoces viginti deductæ: Latum inde ad populum, "vellent, juberent, populo Carthaginiensi bellum indici."

Having travelled a considerable way, and being fatigued, he laid down the sticks, and began to think of the evils of his condition, old age, weakness, and poverty. At last, weary of life, he called on death to come and release him from his toils. Death heard the old man's prayer, and instantly made his appearance, asking him, at the same time, what he wanted. The old man, much frightened, replied: ‘I called you only to lift up my burden, and put it on my back.’ The fable shews, that, even in the worst circumstances, almost all men prefer life to death.”

2. Translate the following passage into Oordoo.

As to old men, their bodily labours seem to require diminution, but the exercises of their mind ought even to be increased. Their care should be to assist their friends, the youth, and above all their country, to the utmost of their ability by their advice and experience. Now there is nothing that old age ought more carefully to guard against, than giving itself up to listlessness and indolence. As to luxury, though it is shameful in every stage of life, in old age it is detestable, but if to that is added intemperance in lawless desires, the evil is doubled; because old age itself thereby incurs disgrace, and makes the excesses of the young more shameless.

3. Translate and point out the peculiarities in the following lines of Souda.

With the view of prosecuting a religious war, he invaded India, and fought a great battle on the confines of the Koh-júd with Raja Jaipal, the ruler of India. Peace, however, was concluded with Jaipal, but the Hindu Monarch having violated the conditions of the treaty imposed on him, the King marched against him a second time with a disciplined force consisting of one hundred thousand horse, and a great number of elephants. An obstinate battle was fought, in which the hosts of Jaipal were totally defeated.

4. Find a mean proportional between two given straight lines.

5. If two planes cut one another, their common section shall be a straight line.

*Examiner.*—REV. W. C. FYFE, M. A.

1. Give a free and illustrative paraphrase of the following passage :—

“Free writing and despotism are such implacable foes, that we hardly think of blaming a tyrant for keeping no terms with the press. He cannot do it. He might as reasonably choose a volcano for the foundation of his throne. Necessity is laid upon him, unless he is in love with ruin, to check the bold and honest expression of thought. But the necessity is his own choice; and let infamy be that man’s portion, who seizes a power which he cannot sustain, but by dooming the mind through a vast empire, to slavery, and by turning the press, that great organ of truth, into an instrument of public delusion and debasement.”

And all that breathed they died

Sunk in the rolling waters : such the crime

Nam illud mihi nequaquam dignum industria, conatuque meo videbatur, istum a me in iudicium jam omnium iudicio condemnatum vocari, nisi ista tua intolerabilis potentia, et ea cupiditas, qua per hosce annos in quibusdā iudiciis usus es, etiam in istius hominis desperati causa interponeretur. Nunc vero, quoniam haec te omnis dominatio, regnumque iudiciorum tanto opere delectat: et sunt homines, quos libidinis infamiaeque suae neque pudeat, neque taedeat; qui, quasi de industria, in odium offensionemque populi Romani irruere videantur: hoc me profiteor suscepisse; magnum fortasse onus, et mihi periculosum; veruntamen dignum, in quo omnes nervos aetatis industriaeque meae contenderem.”

The child of Themistocles governed his mother; she governed her husband; he governed Athens; Athens, Greece; and Greece the world: therefore the child of Themistocles governed the world.

He who calls you a man speaks truly: he who calls you a fool, calls you a man: therefore he who calls you a fool speaks truly.

For those who are bent on cultivating their minds by

diligent study, the incitement of academical honours is unnecessary ; and it is ineffectual for the idle, and such as are indifferent to mental improvement : therefore the incitement of academical honours is either unnecessary or ineffectual.

He who has a confirmed habit of any kind of action, exercises no self-denial in the practice of that action : a good man has a confirmed habit of virtue : therefore he who exercises self-denial in the practice of virtue is not a good man.
